PROJECTS

1. ECOMMERCE

- Built a fully functional e-commerce platform using the Nodejs, Express, Mongoddb, EJS, CSS and Bootstrap with MVC architecture
- In client side implemented features such as user authentication, product listing, wish list, shopping cart, OTP verification by using Twilio, profile management, order tracking and cancellation and Razorpay payment integration.
- In Admin side implemented user management, product management, coupon management, banner management, sales report, graphs
- Worked with Git for version control and followed Agile development methodologies. Deployed the platform to AWS.
- <https://womanish.online/>

2. WEATHER APP

- Creating a weather application with React.js for the frontend ensuring a seamless user experience
- Leveraging Vue.js framework for the frontend to craft a responsive and interactive user interface, enriching user engagement and satisfaction.
- Integrating the Weather Map API to retrieve real-time weather data, furnishing users with precise and current weather conditions, forecasts, and additional information.
